

# ANTONIO DI LAURO

Information Engineer | Data Intelligence & EDI  
Specialist

## LANGUAGES AND CERTIFICATION

**Italian** — Native language

**English** — B2 First Certificate

**Driving license** — Category B

## EXPERIENCE

**Würth S.r.l., Egna (BZ), Italy | Feb 2026 – Present**  
**Data Intelligence & EDI Specialist | Sep 2026 – Present**

Full-time ownership of enterprise B2B/EDI data integration flows and production deployment of software automations and Generative AI solutions.

- End-to-end development, management, and maintenance of enterprise EDI flows using the Seeburger platform (BIS Mapper) and XPath, integrated with SAP ERP and Oracle SQL systems;
- Production deployment, fine-tuning, and maintenance of an AI Agent and RAG (Python) architecture for automating legacy mapping logic migration;
- Design and implementation of internal Python automation tools to enhance operational efficiency, data traceability, and mapping workflows;
  - Continuous monitoring and advanced troubleshooting of high-volume data exchanges between enterprise core systems and business partners.

**Data Intelligence & EDI Intern | Feb 2026 – Aug 2026**

Collaborated within the IT-Data Intelligence team, managing data integration flows and conducting applied research for my Master's thesis project.

- Analysis, configuration, and troubleshooting of EDI data flows using Seeburger (BIS Mapper) and XPath across SAP and Oracle SQL environments;
- Design and development of an AI Agent and RAG (Retrieval-Augmented Generation) pipeline in Python for automated legacy code migration;
- Development of automation scripts in Python and code version control management via Git;
- Implementation of validation and control loops to guarantee enterprise data integrity.

## SKILLS

### Technical Skills

- **Machine Learning & AI:** AI Agents & Agentic Workflows, RAG (Retrieval-Augmented Generation), Large Language Models (LLM), Prompt Engineering, Deep Learning, Computer Vision (YOLO, pose estimation), PyTorch, TensorFlow, Scikit-Learn
- **Data, EDI & Enterprise Systems:** Electronic Data Interchange (EDI), Seeburger (BIS Mapper), SAP (ERP), Oracle SQL, XPath, Data Integration & Mapping, Log Analysis & Troubleshooting
- **Languages & Scripting:** Python, Java, C/C++, SQL, XPath, Bash/Linux scripting, Gosu
- **Software Development & Tools:** Git/GitHub, Software Development Lifecycle (SDLC), API design & integration, Agile/Scrum,

## **Analyst Software Engineer | Fincons Group, Trento (TN), Italy | Jan 2024 – Jun 2024**

Collaborated on the development and maintenance of software solutions for the financial services sector, contributing to backend module implementation in Java and Gosu within an Agile environment.

### **Key Responsibilities:**

- Analysis and implementation of new features for enterprise applications;
- Debugging and code optimization to enhance system stability and performance;
- Participation in code reviews and continuous integration (CI/CD) processes;
- Collaboration within a multidisciplinary team to ensure software quality and architectural consistency.

**Result:** Achieved full autonomy across the software development lifecycle and consolidated expertise in enterprise architectures and Agile methodologies.

## **EDUCATION**

### **Master's Degree in Information Engineering | Sep 2024 – Present | University of Trento, Italy**

- **Ongoing Thesis (in collaboration with Würth S.r.l.):** *"Development of an AI Agent and RAG Architecture for the Automation and Migration of Legacy EDI Flows"*. Research on Large Language Models (LLM) for semantic understanding of legacy documentation/code and design of self-correction systems for code validation.
- **Key Coursework:** Machine Learning, Computer Vision, Digital Signal Processing, Distributed Systems, High Performance Computing, Cybersecurity, Networking.

### **Bachelor's Degree in Computer Engineering | Graduation Date: Nov 26, 2024 | University of Trento, Italy**

- **Thesis:** *"Development of a Digital Twin for Wireless Coverage Analysis in Urban"*
- **Acquired Skills:** Programming (C, C++, Java, Python), Databases, Computer Networks, Operating Systems, Machine Learning, Wireless Propagation, and IoT.

Debugging & Code Optimization, Web Applications (Node.js/React)

- **Systems, Networks & Cloud:** Distributed Systems, Operating Systems, Docker/Containers (Kubernetes fundamentals), High Performance Computing (HPC), TCP/IP, SDN slicing concepts, Digital Twin, IoT
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Data preprocessing & feature engineering

## **Soft Skills**

Advanced enterprise problem-solving, multidisciplinary teamwork, adaptability, analytical and strategic thinking, research- and innovation-driven mindset, technical communication, and priority management.
